Summary

I am a PHP Laravel Developer with hands-on experience in creating dynamic web applications. I work with technologies like Laravel, PHP, MySQL, JavaScript, and CSS frameworks such as Bootstrap and Tailwind to build clean, responsive, and efficient websites. I enjoy solving challenges and ensuring that the final product meets the client's expectations.

Experience

Projects

Mountenna Education

Jan 2026 - Jan 2026

<https://www.mountennaedu.co.uk/>

Developed a PHP-based student consultancy portal for Mountenna Education to streamline the UK university admission process. The system included multi-step application forms, document upload with auto-ZIP generation, email notifications, dynamic university listings, and testimonial/blog management via admin panel. Improved admin workflow, reduced onboarding time, and enhanced lead collection via integrated SEO strategies.

Mountenna Group

Feb 2026 - Feb 2026

<https://mountennagroup.co.uk/>

Built a business agency website for Mountenna Group — an organization offering services in education, tech consulting, and staffing. The site was designed for credibility and clarity, with a modern layout, team showcase, service breakdown, blog CMS, and contact integrations. This project marked the beginning of my agency portfolio under Team Cipher.

Skills

PHP, Laravel, Javascript, Tailwind, Bootstrap, HTML, CSS

I have experience working with Laravel, a PHP framework, to build dynamic web applications
